with double rudder assemblies were parked at Finsterwalde airfield. No change of occupation has been observed at the field since June 1951. \*

2. On 2 November, eight twin-engine bombers were observed at the field. There was no flying. A radio installation was observed for the first time south of Nehesdorf. \*\*

\* Comment. According to another source, it is believed that two bomber regiments equipped with PE-2s are stationed at the field. The number of aircraft at the field has not been determined.

\*\* Comment. This radio installation was observed by another source                      According to the description, the installation is an Adcock DF station which is located south of Nehesdorf, in the western extension of the runway.
